

Python Coding Camp

What will your child learn?

- Fundamentals of programming and applications of Python.
- To learn the basics of Python and applying it to solve logical problems.
- Understand concepts like control flow, conditionals and loops through python.
- Understand the concepts of classes, objects and functions.
- Using python for file handling and operations.
- To think creatively, reason systematically and work collaboratively.

Python program details:

- Python is a high level, interpreted, interactive object-oriented programming language designed to be easy to read and simple to implement.
- The curriculum is curated to encourage early computational aptitude in young students.
- It's a 12 – week (3 month) program, having 2 online live sessions per week.
- Our mentors are from Tier-I institutes like IITs, BITS & IIITs.
- The classes will be conducted on Google Hangouts or Zoom Video Conference.
